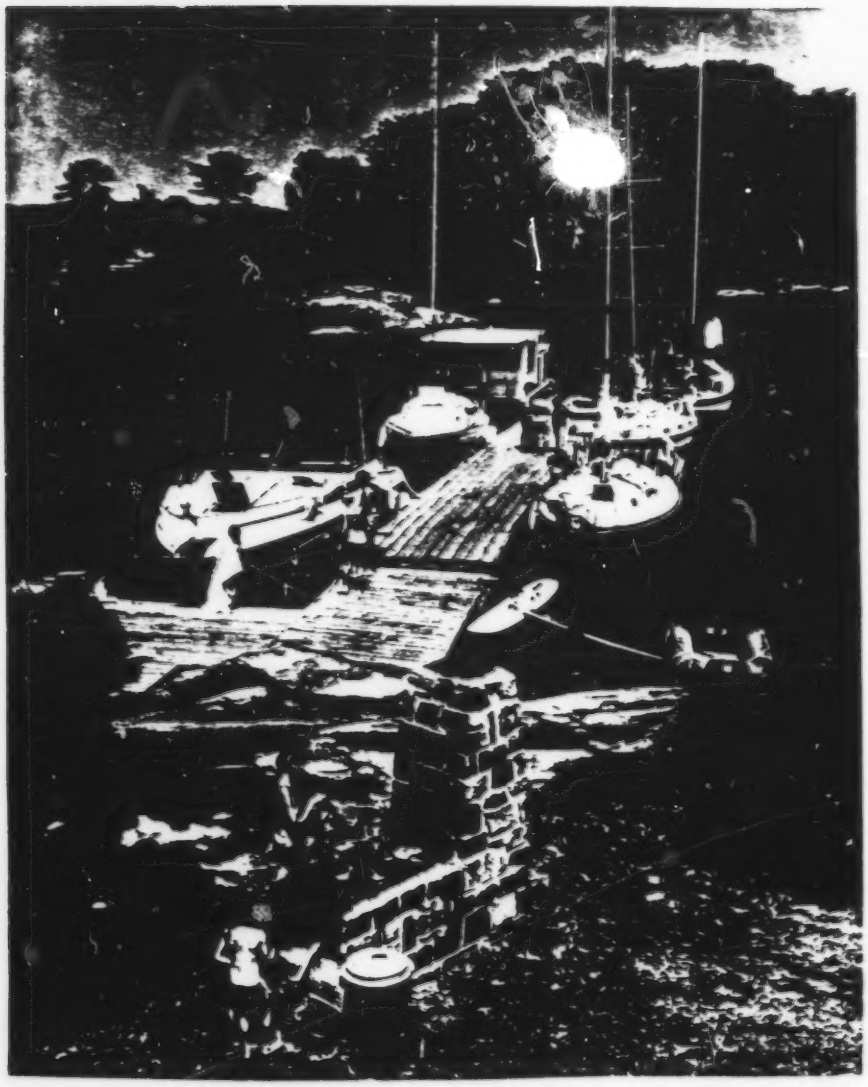
AN INTRODUCTORY GUIDE TO

BOATING

INFORMATION SOURCES



Karen Dixon
Visitor Activities Branch
National Parks
Canadian Parks Service
Dec 1991

93-01697

INTRODUCTION

Canadian Parks Service (CPS) staff require more innovative ways of accessing key information sources to assist them in the planning, management and delivery of boating opportunities and related services.

This **introductory guide** to information sources on boating has been developed for CPS staff, particularly regional Visitor Activity Specialists. The information sources identified herein represent a synthesis of potential data sources that has been developed over a relatively short period of intensive research.

For the purposes of this research, boating is defined as a water activity consisting of power boating, cruising or sailing on an open water body, river or canal. It includes both day, overnight and transient boater trips.

In order to develop a concise and practical guide to the most useful information sources, the following criteria were used to gather and screen material.

1. Post publication date 1980. (with some exceptions)
2. Material must be accessible to CPS staff.
3. Comprehensive and representative examples.
4. High quality reports and studies.
5. Emphasis on Canadian information sources and include international examples where appropriate.

The introductory guide should be used in conjunction with approved planning processes, (Visitor Activity Management Process and A Guide to Service Planning),as well as your own information systems, experience, and existing "informal networks." **It will be necessary to look beyond this guide for more detailed information.**

Local associations and publications should also be used to keep the reader informed of courses, seminars, exhibits, and learning opportunities in their region.

FORMAT

This guide has been organized by the following **subject headings**:

1. Activity Description - with definition of activity, setting, time of year, skills and equipment.

2. Experience/Behaviour - needs, motivations and expectations from a visitor perspective and from a management perspective, departure information and evaluation.

3. Market Characteristics - origin, age, sex, language, group size, group composition, mode of access, education, occupation, length of stay, park use patterns and trends.

4. Operations - day to day operations of facilities, boating equipment and related services.

5. Strategy/Planning - strategies and planning for the provision of boating services.

6. Public Safety - accident prevention, search and rescue services, hazard monitoring, and public safety planning.

7. Resource Protection - measures taken to prevent damage caused by human or natural agents to the resources of the park, site or canal.

8. Trends - changes in the boating market, styles of boats, equipment, setting desired and use patterns.

9. Policy/Regulations - offical CPS documents relating to boating.

For each major subject heading a list of information sources is provided with sample references.

Sources include:

1. Articles;
2. Brochures;
3. Books;
4. Directories (advisory information);
5. Guidebooks (a book of information often for travellers);
6. Reports;
7. Technical/standards information (specialized and technical knowledge).

The information sources under each major heading are also grouped geographically to facilitate access to regionally specific information sources.

OTHER INFORMATION SOURCES

Libraries

Local, regional and national libraries offer an array of services: reference information, personal assistance and access to electronic databases. Specialized libraries for trade, research, government and non-government departments should also be consulted.

Computerized Information Retrieval

Sources provided include:

- automated information retrieval.
- information booklets on the databases which they offer.

"Host", "supplier" or "vendor" are names given to commercial organizations with computers that produce databases available on-line to any user who subscribes to the service (dialing in from remote sites). Users are provided with an opportunity to subscribe to one or more hosts for a nominal fee. These databases can be accessed through some libraries. Searches are most effective if the topic is specific.

Periodicals

This includes:

- journals, serials, and magazines. Many publications are produced at regular intervals and may be more current than other sources of information;
- information on current projects, practice, and techniques.

LOCATING REFERENCES

Unless otherwise indicated, the books and periodicals included in this bibliography can be obtained at the various locations listed below.

*Note: **Disponible en français sous le titre "Répertoire de documents sur la sécurité nautique - 1991"**

It provides reference information for 251 boating related documents. These are some of the topic headings that the directory references: safety, regulations, emergencies & first aid, alcohol, navigation and harbours. Information on alternative information sources is also provided. Some of the documents are free, some are available on loan and some are available for a cost. Documents come in many forms: video tapes, books, activity sheets and phamplets.

For **more information** on boating safey call this toll free number: 1-800-267-6687.
